

Alexa echo app for iphone

Continue

How to connect echo show to alexa app on iphone. How to pair alexa echo with iphone.

Download and install the Alexa app from your mobile device app store. Add the Alexa widget for easy home screen access. Open the app store on your mobile device. Search for Amazon Alexa app. Select Install. Select Open and sign in with your Amazon account. Install Alexa widgets (optional). Tip: Widgets allow easier access to Alexa from your device home screen. Alexa widgets become available in the device widget menu after you sign in to the Alexa app. On iOS (iOS 14 or newer) or Android devices, long-press the home page of your device and follow the instructions to add widgets. Softonic reviewThe free Amazon Alexa app turns your smartphone or mobile device into a controller for any device controlled by the Alexa system. Use the app to manage your preferences, create shopping lists and more, even when you're not around your Alexa device. Perhaps the most important feature is the ability add Skills -- integration with third-party apps -- to Alexa. If you don't have Amazon Prime, for instance, you can set Alexa to stream music from your Spotify account.Bringing Alexa to lifeThe Amazon Alexa app adds a huge range of features to the Alexa voice-control system, allowing you to customize your experience. There are some gaps in the Skills available, and some differences between what's available in the US and UK releases, but more Skills and features are regularly added. Setup can be a little time-consuming -- although Alexa devices like the Echo are very much intended for people who like setting up gadgets -- but once it's done managing the device via a combination of the app and voice controls is simple.A vital tool for Alexa usersThe Amazon Alexa app is an absolute necessity for owners of an Alexa device such as Amazon Echo; without it, Alexa is only half complete. If you don't own such a device, of course, you don't need it at all.Simple interfaceVital for Alexa device usersWide range of available SkillsSkill list incompleteOrganization can sometimes be confusingAmazon Alexa for WindowsAmazon Alexa for Android You probably already know that Alexa is a virtual assistant used for Amazon Echo, Echo Dot, Echo Studio, and other smart speakers. You may not know that the Alexa app also works on iPhones and can be used even if you don't have an Amazon device. You can use the Amazon Alexa app to set up an Echo smart speaker, as well as to pair your iPhone with a smart speaker via Bluetooth. Here's everything you need to know. How to use the Alexa app for iPhone1. Download the Amazon Alexa app from the Apple App Store.2. In the pop-up menu about enabling Bluetooth, tap OK to allow Alexa to set up or connect with other devices (like your iPhone or Echo speaker). Enabling Bluetooth is key to connecting and setting up your Amazon smart speakers. Abigail Abesamis Demarest 3. Sign in to your Amazon account.4. Tap Continue to agree to Amazon's terms and conditions.5. Tap Yes or No to set up a device.6. Tap to select who you are from the list of options. Confirm your first and last name, then tap Continue.7. Tap Allow if you want to give Alexa access to your contacts (so that you can use commands like "call mom") and allow notifications. To skip this step, tap Later.8. Continue to follow the on-screen prompts to set up Alexa, which includes teaching Alexa your voice. You can skip any steps in the set-up process by tapping Skip. Enabling Microphone access is necessary to speak commands to Alexa. Abigail Abesamis Demarest 9. To enable Alexa, say "Alexa" or tap the blue Alexa icon at the top of the screen, then speak your request. You can also tap the keyboard icon to type out your request. If you have hands-free enabled, you can just say "Alexa" to activate the virtual assistant. Abigail Abesamis Demarest How to add the Alexa widget to your iPhone home screeniPhones running iOS 14 and later have a home screen filled with widgets, which can be found if you swipe all the way left past all your different screens containing apps.If you know you're going to use Alexa (or any other app) often, the home screen is a good place to put it for easy access.1. On your iPhone, swipe left until you hit the home screen filled with widgets.2. Tap and hold your finger down on one of the widgets (it doesn't matter which one) until a pop-up menu appears. Tap Edit Home Screen. Tap any widget on the home screen to see the pop-up menu and make edits. Abigail Abesamis Demarest 3. Tap the plus + icon at the top-left of the screen, then tap the Amazon Alexa icon. If you can't find it easily by scrolling, tap the search bar to find it. Tap the + button to add widgets to your home screen. Abigail Abesamis Demarest 4. Tap Add Widget. Use your finger to reposition the widget, as desired, then tap Done when finished. How to pair iPhone to Amazon devices via Alexa appYou can pair your iPhone with any of Amazon's smart speakers like the Echo, Echo Dot, and more via Bluetooth.1. Put your Bluetooth device (Echo, Echo Dot, etc.) into pairing mode.2. Open the Alexa app, and tap Devices. Navigate to the Devices tab to set up a speaker or pair your Phone with an Amazon device. Abigail Abesamis Demarest 3. Tap Echo & Alexa.4. Select your device from the list of options, Tap Bluetooth Devices, then Pair a New Device.5. The next time you want to connect, simply enable Bluetooth on your iPhone and speaker and say "Pair Bluetooth." Alexa is a friendly, helpful assistance that can be accessed at the touch of a button. Alexa will respond to your voice when you need to know something, covering a range of topics and information.Alexa provides handsfree, voice-activated assistance on your mobile phone. The app responds to a variety of questions, from asking about the weather to giving you directions. Alexa contains a plethora of commands and questions. If the voice-activated application does not recognize what you are saying, the intuitive program will offer alternate suggestions. Unlike Siri, Alexa does not respond to a specific wake-word. Users first need to open the program and then speak to the app. The program only works optimally when the latest version of the app is installed on the phone. Failing to update the software can result in some errors. The standard, voice-activated assistant on iPhone is Siri. Users who prefer Alexa over Siri cannot override Siri and install Alexa as the default option. Alexa requires you to allow the app to use your location at all times. This can drain the battery life on your mobile device. If you are living in a Smart home, you can use Alexa to arm and disarm several features inside your house, including speakers, lights, and alarms. The app features a whisper mode. This is effective when you don't want to wake up nearby friends of family members. You can use the Alexa application to reserve an Uber ride. Alexa can be used across multiple devices using iOS. Music lovers can connect their Alexa account with their Apple music, allowing them to access saved playlists. Where can you run this program? Amazon Alexa requires iOS version 11.0 and higher to function. Is there a better alternative? Yes. Siri is often preferred to Alexa, mostly because Siri comes as a standard feature on iPhones.Alexa is an effective tool that does not require too much time or attention, but we prefer Siri as the favorite. Should you download it? No. Users who have an iPhone should stick with the standard version, Siri.HighsResponds to pre-programmed voice commandsOffers suggestionsLowsDoes not operate with a wake-wordCan't change to default voice control Use the Amazon Alexa app to manage Alexa-enabled devices, control music playback, view shopping lists on the go, keep track of upcoming reminders, check on active timers and much more. When you enable hands-free with Alexa, you can talk to Alexa by simply saying "Alexa" when the app is on your screen. The more you use Alexa, the more she adapts to your voice, vocabulary and personal preferences.DISCOVER MORE• Get more out of your Echo device through personalized feature recommendations from Alexa• Discover and enable recommended Alexa skills• Pick up where you left off directly from the home feed with lists, shopping, or recently played Music and BooksMANAGE YOUR DEVICES• Set up your Alexa-enabled devices, control or check status of your compatible smart lights, locks and thermostats at home or on the go• Create routines to automate your smart home devicesMUSIC & BOOKS• Connect to music services like Amazon Music, Pandora, Spotify, Tunes, and iHeartRadio. Choose a song or playlist and listen on your Alexa-enabled devices• Create speaker groups to play music across your compatible Echo devices for multi-room musicORGANIZE YOUR DAY• View and edit shopping and to-do lists on the go, get weather and news updates, manage timers and alarms, and moreSTAY CONNECTED• Use Drop In from your app to connect instantly with your compatible Echo devices, like a two-way intercom• Call or message supported Alexa-enabled devices, at no additional cost.By using this app, you agree to Amazon's Conditions of Use (www.amazon.com/conditionsofuse), Privacy Notice (www.amazon.com/privacy), and all of the terms found here (www.amazon.com/alexaterms). Sep 7, 2022 Version 2.2.496265.0 Various bug fixes and performance improvements. Very difficult to make routines or control things around the house. It should be much easier to see any decide or gadgets around the house, light bulbs or speakers, outlets. Still a lot to work on Alex's capabilities to make her more efficient. I'll be happy when in 1,2,3 minutes and she would be able to see and discover every new devise found in the house or any Bluetooth gadgets she did not know. Phone calls shouldn't be a problem if Alexa is connected to my network regardless if she's connected to my phone call should be allowed and what's going in with WhatsApp? It's worldwide as possible why not to give her access to use it to call other countries? That's really a plus +++++. Once Alexa has access to the network it should be easy to discover anything hooked up to the same network via Bluetooth or wifi it's all password protected and in the same house why dBe she need constant permission? She should be able to discover my car for husband car or the house or office callif she has been there once and access was granted why can't she always has clearance? Constantly having to connect her tiny cell if leave the house then she gets totally disconnected. Akexa should be able to call my cell in her own to ask if she should turn on the lights for my dogs. That's how efficient she should be and she's capable, just have to work the perks..? Any person in their sixties needs to have this machine. This machine is invaluable to people who want to or need to live independently. It reminds you to take your medicine....read the reminder or Alexa will tell you the reminder. It's a great way to stay in touch with an elderly person. Is Grandma still in her pajamas at 2:00 in the afternoon, not getting out even though she assures you that she's up and dressed and has walked the dog? This machine allows you to "drop in" and see grandpa taking all of his meds. You can actually "drop in" on a lonely person and eat "together" even while you are in Delaware and your loved one is in Florida if you both have the Alexa Show. To know that an elderly person is exercising, being social, eating regularly, and taking meds.....what a relief! Buy an Alexa Show right now so you can get "you and your loved-one" acclimated to the machine before you actually need it... that's why I picked 60's as a great age to buy it. It becomes part of your life and believe me, it is a life-saving tool. One more thing....it is easy to install and to use. I am not kidding! You will be so grateful that someone invented this machine! It's so helpful. Our sons and our bedroom are close together. He has an echo kids. When we say good morning Routine it plays on our echo in our bedroom instead of his bedroom. We constantly miss listening to our morning news and weather. Other than changing Alexa's name we wish you could make Alexa ignore a 2,3,and 4 year old. It was cute at first but now it totally annoying to the point where we just want to get rid of Alexa and the 4 units we bought. I like being able not to have to talk to Alexa and being able to type commands or to switch buttons. I don't like the volume control as it blasted as it jumps several volume levels at a time and help destroy my new very expensive speaker system on my stereo which also is hooked to sound our TV. This is bad having Alexa listen to your 3 year old crank up the volume. A lot would have to change for me to ever give it 5 stars. There are some nice features but are outweighed by the bad. Alexa needs more and better Setting Controls and a way to ignore small children who like to change music every 5 seconds. I want to turn on my garage lights first and after I scrolled through every other light in the house I finally arrive to where I can turn the switch on; you should be able to arrange the switches the way you want. Still haven't figured Kids Free time out. Hard to have other main adult family members use the app too; only one master.
