With this new Hitman Absolution trainer you will be able to make use of infinite health, maximum infinite instinct, infinite ammo, no reload, super accuracy, super impact, super sprint/speed, super stealth and teleporter in-game cheats that will prove to be more than useful allowing. NOTE: This cheat can only be used with the 1.0.446.0 version of the game. NOTE: Some antivirus and antispyware programs flag the trainer as being infected/malware, although the application is perfectly safe and does not pose a threat to your system. This is called a 'false positive'. The term false positive is used when antivirus software wrongly classifies an innocuous (inoffensive) file as a virus. The incorrect detection may be due to heuristics or to an incorrect virus signature in a database. I'm having a bit of trouble with it Notice: Trainer password : mrantifun.net , First start game then activate the trainer and choose inf ammo it is not working like nothing happens plss help thank you um hi when i activate the trainer and choose inf ammo it is not working like nothing happens plss help thank you Ty mr. :3 but they kill me U-U trainer and it works perfectly fine on steam release of the game. Greetings, Trainer is viral clean as far as I know, and semi workable. Inf Ammo seems to glitch out at 8 bullets. I can fire those 8 over and over again but never fire an entire magazine. To illustrate: Dexter's Ultramax 8/50 Stops firing after every 8 rounds. this was in contracts though, so perhaps its only meant for singleplayer. I feel shamed I have to resort to a trainer, because appearantly the developers thought its unneccesary to carry more than 2 magazines for an assault rifle that isnt ISA standard. Sigh. mrantifun, please make this trainer and it works perfectly fine on steam release of the game . sometimes, when still using your trainer, my hitman abso (steam version), crash to dekstop.... why?? using the other, get similiar result.... spec pc; i5 3570, 16gb, gtx 970 4gb, corsair gs 700w 80+ bronze First off: amazing trainer. Thank you very much Antifun. Then an issue I've had: the trainer didn't want to work. The anticheat protection wouldn't activate unless I was offline. I unplugged my ethernet cable, so, opened the trainer, activated it, and then plugged in the ethernet cable. This procedure allowed me to use the trainer both in SP and in Contracts while online. F1 not working for me ^^. Tried using the trainer, but all that happens is that my trainer becomes entirely unresponsive and crashes without making a sound. F1 not working for me ^^. The trainer was working but then one day it said: Stream read error, So I tried to redownload the trainer and when I tried to open it winrar said that the file was damaged. I also can't extract it. The trainer was working but then one day it said: Stream read error. So I tried to redownload the file after you disabled your antivirus! Hey just wanted to say thanks for all the hard work! thanks I was very helpful it works man !! thankyou very match !!! i've copied the password and the trainer said wrong password????? i can't download Oo ok i fix i still wonder why they implement anti cheat software for a singleplayer game.... And here the answer: The game and the sniper challenge have online stats and this is the answer to your question. The trainer is telling me wrong password lol Page 6 doesnt work any more pls update: 3 "You have to manually type the password in. NOT copy and paste." Still don't work, boss. I start game from steam, then run trainer, manually type "mrantifun.net" without quotes, hear short sound, Active Trainer change color to red, but all buttons stay grey and inactive. Can you make something with it? Tks the for the trainer, work with me Doesn't work for me either is it because its a steam edition? Or Ive typed it in instead of C&P and then pressed the hot keys but nothing i get a notification sound but not cheat activated like you normally hear. Active Trainer is in red "You have to manually type the password in. NOT copy and paste." i have the same problem, after encoding the password, click the "activate trainer" button and it turns red (which means its activated) but when i press F1, F2, etc they wont activate, please fix, thanks the password is not working manually password and its work...thank youuuuu...) I have a same version game with your trainer but it won't activate the cheat.. Please inferior version 1.0.447 on the site Thankful It says its a malaware virus... The Undetected Option doesnt work in the new dlc anymore. Please fix Trainer works! Not working inf. ammo! Password is: mrantifun.net Only it wanted to change the key F1 (in game is this button notebook) That's All Thanks MrAntifun - you are BEST Page 7 MrAntifun , 你的修改器简单易用,而且功能强大。爱 你么么哒~ Ya trainer won't work anymore.... У меня не подходит пароль для тренера что делать? Sept 2 2016 - still works. Follow the instructions like he said. 1. Start game 2. Actually start a mission 3. Open trainer as admin 4. MANUALLY type in password to unlock trainer and hit enter 5. Hit F1 to activate the trainer 6. Everything works except F3 - Infinite ammo (which is greyed out) - all other options are in red 7. For money, simply grind contracts. I can make 200k every mission Undetect works pretty well but if you hover around one spot for too long or fire more then 1 round, you WILL be detected and disguise will be blown. Have fun. THANK YOU MRANTIFUN!!!! Your trainers are the absolute best! mrantifun.net password is not working MrAntiFun you can add, Edit hotkeys , because hotkeys F1 need to open the laptop in the game Trainer working just it does not detect the game. Detection requires in the root game folder to change the name of exe files in HMA it will work У меня не подходит пароль для тренера что делать? Пароль правильный просто тренер не видит игру, измени в корневой папке игры название exe файла с game на НМА и все заработает. У меня тоже самое было исправил и все пошло This is a good trainer any chance you can make the same trainer but configurable keys because every time I press the f1 key it disables my trainer in the middle make the same trainer but configurable keys because every time I press the f1 key it disables my trainer in the middle make the same trainer but configurable keys because every time I press the f1 key it disables my trainer in the middle make the same trainer but configurable keys because every time I press the f1 key it disables my trainer in the middle make the same trainer but configurable keys because every time I press the f1 key it disables my trainer in the middle make the same trainer but configurable keys because every time I press the f1 key it disables my trainer in the middle make the same trainer but configurable keys because every time I press the f1 key it disables my trainer in the middle make the same trainer but configurable keys because every time I press the f1 key it disables my trainer in the middle make the same trainer but configurable keys because the f1 key it disables my trainer in the middle make the same trainer but the middle make th of a firefight and I get shot down?
